

Dear Madam/Sir,

The Master Program in Statistics of Math Department of UCSD provides me a strong theoretical background and experience in data analysis. A strong understands of validity of statistical methods and application will enable me to do the data-oriented job accurately and effectively.

As a member of Graduate Mathematics Consulting Group of UCSD which helps people with mathematical questions arising in their research, I got practical consulting opportunities to broaden my analytical training by applying mathematics in other fields and communicating analytical ideas to non-specialist. Last month we assisted a researcher's to optimize her experiment design and to build a more accurate model to analysis the effects of molecular on rheumatoid disease.

At Board Trac, a action sport marketing and research company. I assist the analyze of database for my group. Experiences at this company strength my ability to handle practical problem. I am confident that I will learn quickly when I meet a new problem in Palo Alto Medical Foundation Research Institute.

Thank you for your consideration. I will follow up during your evaluation process. If necessary, I would be glad to provide any further information you might need regarding my candidacy.

Sincerely,

Dong Nie
